

ABOUT US

ShreeGluco Biotech Pvt. Ltd. is promoted by Mr. Srinath Bysani who is pioneer in Corn Trading for the last three decades. This is a forward integration of existing trading business.

Mr. Srinath Bysani, the Chairman & Managing Director of ShreeGluco Biotech Private Limited (SGBPL) has successfully engaged himself into diversified areas like, construction and development of commercial and residential spaces apart from Corn Trading. His vision to become a corn wet miller will become reality by October 2017.

Besides being a successful businessman, Mr. Srinath Bysani has also engaged himself into several corporate social responsibilities by donating to many organizations like Hostel, Educational Institution and Hospital. He is the trustee of Vasavi Medical Trust, Vasavi Vidya Niketan and Vasavi Hostel Trust. Apart from this he is a trustee in Bysani Seetharama Shetty and Bhagyalakshamma Charities, which is a family trust.

OUR OBJECTIVES

THE MAIN OBJECTIVES OF THE COMPANY ARE

- Manufacture, Market and Export the corn wet milling products & its derivatives in the food, pharmaceutical, industrial, animal feed & poultry applications.
- Providing world class manufacturing technology of corn wet milling with a co-generation Power Plant using Biomass, Coal and Biogas Etc.
- Providing world class innovative R & D in the field of new product development and applications.
- Offering most advanced dedicated line for capital JV / Toll Manufacturing of high end modified starches.

A close-up of a target with several arrows hitting the bullseye, symbolizing precision and achievement.

OUR MISSION

To be the leader in the starch and Starch Derivatives Industry in India and to serve the requirements of clients in India & the export market

OUR CORE VALUES

- Customer First
- Quality
- Integrity
- Personal Accountability for Excellence
- One Company ,One Team
- Continuous Improvement

PRODUCT OVERVIEW

We Provide a wide variety of ingredients solutions to customers in more than 20 diverse industries around the country, including Food, Beverage, Pharmaceutical, Corrugating, Paper, Textiles, Leather Tanning, Animal feed, Healthcare & Wellness segments.

OUR MAIZE PRODUCT RANGE

PRODUCT	GRADES
1. Maize Starch Powder	Food grade, Industrial, IP/BP/USP
2. Liquid Glucose	Confectionery, Industrial, USP/NF, High DE
3. High Maltose Corn Syrup	Confectionery, Brewery
4. Maltodextrin	Food grade, Industrial grade, BP/USP
5. Dried Glucose Syrup	Food grade
6. Modified Starches	Oxidized, Cationic, Amphoteric, Esterified, Acetylated Acetylated di-adipate, Hydroxy propylated, Acid modified starch (TBS), Spray starch, White & Yellow Dextrin Pregel Starch(Industrial & Food)
7. Dry Modified Starches	Textile Starch, Corrugation Starch, Dextrin & Thin Boiling Strach
8. By-Products	Germ, Maize Bran, Maize Bran enriched, Gluten and Corn steep liquor

MAIZE STARCH

Maize Starch manufactured at SGBPL with the state of the art technology by the wet milling of GMO free maize, refined and dried as a free flowing powder.

MODIFIED STARCHES

Modified starches at SGBPL involves the alteration of the physical & chemical characteristics of the native starch to improve its functional characteristics, can be used to tailor starch to specific industrial & food applications by stabilizing the starch granules during processing to provide a functional persistence . Finding applications in Industrial (paper & corrugated board / oil drilling), food (bakery, confectionery & chocolates, beverages pharmaceuticals & cosmetics.

LIQUID GLUCOSE

It is a refined and concentrated aqueous viscous syrup of nutritive saccharides derived from starch by controlled liquefaction. It is also known as Glucose syrup.

HIGH MALTOSY CORN SYRUP

It is a purified and concentrated aqueous solution of nutritive saccharides characterized by having less than 10% dextrose and maltose content from 28 - 70% or higher. Having applications in confectionery or brewing.

DEXTROSE SYRUP

Dextrose syrups are purified and concentrated, nutritive saccharides with a sweet taste having minimum 95% of dextrose. Finding its application in fermentation / food / pharmaceuticals.

MAIZE BRAN AND MAIZE BRAN ENRICHED

It is byproduct of the corn wet milling containing a mixture of the bran fraction & other products with a protein content varying between 9-15% , crude fiber (5-20%) & Starch content b/w 17-25%. Hence finds its application in cattle feed, poultry feed & aqua feeds.

MALTODEXTRIN

Maltodextrin / Corn dried Glucose syrup are spray dried free flowing white powder having a bland taste with very little sweetness produced by partial hydrolysis of refined maize starch. Find its application in brewing, confectionery, as bulking agent / carrier & many more.

CORN STEEP LIQUOR

It is a byproduct of the Corn wet milling, a viscous concentrate of the corn solubles containing amino acids, vitamins & minerals. Being an excellent source of organic nitrogen finds application as :

- Important constituent of growth media & culturing penicillium in pharmaceutical industry.
- As a feed additive in cattle & aqua feeds.

CORN GLUTEN

Maize Gluten at SGBPL is the by-product of the corn wet milling manufactured, processed and packed under cGMP to meet the requirements of the end user.

Maize Gluten is the byproduct with high protein content, source of the important amino acids and the natural antioxidant xanthophyll.

CORN GERM

Maize Germ at SGBPL is the by-product of the corn wet milling manufactured, processed and packed under cGMP to meet the requirements of the end user.

Maize germ is a natural source of oil (cholesterol free) and a source of energy for the cattle feed/ poultry feed.

Certifications : To be acquired

- ◆ **FSSC 22000**
- ◆ **ISO 9001 : 2015**
- ◆ **Halal - India / America / Indonesia**
- ◆ **Kosher**
- ◆ **FDA - IP / BP / USP**

APPLICATIONS

INDUSTRIAL

Adhesives
Amino acids
Biodegradable polymers
Brewery
Construction
Corrugation
Explosives
Fermentations
Fine Chemicals
Lactic acid
Leather
Manufacture of Polyols (Sugar alcohols)
Metals
Mining
Oil Drilling
Paper
PLA
Soaps & Detergents
Textile

FOOD

Baby foods
Bakery
Batter coatings
Beverages
Breakfast cereals
Colors
Confectionery
Dairy products - Yogurt, low fat products, UHT puddings
Dry mix foods
Encapsulation
Fat replacers
Ice cream / frozen foods
Infant foods
Instant coffee
Low calorie foods
Meat products
Noodles
Nutritional bars
Pet foods
Snacks
Soups & Sauces
Spray drying

PHARMACEUTICAL INDUSTRY

Antibiotics
Cough syrups
Cosmetics
Tablets

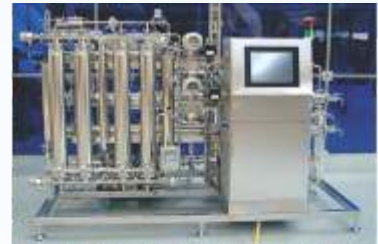

BY PRODUCTS

Aqua feed
Cattle feed
Fermentation industry
Oil industry
Poultry feed

TECHNOLOGY

SGBPL is with the state of the art technology from the leaders in separation, refining & evaporation in corn wet milling that is from Alfa laval.

QUALITY POLICY

Our aim is to achieve, sustain & enhance customer satisfaction by continuously improving the effectiveness of quality management system through teamwork & involvement of all members of our organization.

OUR QUALITY POLICY COMPRISES OF

Manufacturing & supplying of excellent quality maize products & it's by products to consistently meet the needs of esteemed clients and the mankind in general.

Treating health, safety and environmental protection as an integral part of the Quality strategy.

Enhancing customer satisfaction through continuous improvements in Quality management system / Food safety management systems.

SAFETY, HEALTH & ENVIRONMENT POLICY

ShreeGluko Biotech Pvt. Ltd. is committed to provide high Quality Services without adversely affecting the natural resources, environment, health and safety of our entire Stake holder.

TO ACHIEVE THIS GOAL, WE ARE COMMITTING TO

- Establish measure, monitor, assess and continually improve our Health, Safety and Environmental performances through objectives / targets, control of hazards and the encouragement of innovation.
- To comply with the statutory norms of pollution prevention and control while at work by continuous improvement in technology and skills of all our people in all our activity.
- To ensure safe and healthy environment by imparting environmental Awareness among the employees and workmen.
- To ensure that all the employees and workmen follow safety rules/regulation operating procedures/ safe work methods designed to protect people and equipments from risk of injury by imparting proper training from time to time.
